1 Introduction:

Greetings from the bonsai world! We specialize in the skill of cultivating and maintaining bonsai trees on our website. We provide a wealth of knowledge and tools to assist you in setting up and caring for a stunning and flourishing Bonsai Garden, whether you're a beginner or an expert. We hope you will find our website educational and beneficial.

The process of designing a website for a client is documented in this project report, covering the project's scope, objectives, design, development, testing, and research. The customer will use the website as an online platform to promote their goods and services to the general public. The website's layout will be simple to use, visually appealing, and user-friendly.

1.1 Goals:

General goals of constructing a bonsai website:

- To impart knowledge about bonsai plant maintenance and upkeep.
- To display many bonsai plant varieties and styles.
- To market bonsai trees and associated goods.
- To establish a social media or online forum for bonsai enthusiast.
- To offer instructional tools, including videos and tutorials.
- To raise awareness of bonsai's cultural and historical relevance.
- Make the client a sophisticated and presentable website.
- Increase the client's social visibility and enhance their audience.
- Create a platform that is easy to use so that customers may learn about the client's goods and services.
- To raise brand recognition and trustworthiness in the bonsai sector.
- To draw in and keep a significant number of bonsai lovers.

1.2 HTML:

HTML stands for Hyper Text Markup Language, which is the most widely used language on Web to develop web pages. HTML was created by Berners-Lee in late 1991 but

"HTML 2.0" was the first standard HTML specification which was published in 1995 (point, n.d.).

1.3 CSS:

CSS (Cascading Style Sheets) allows you to create great-looking web pages, but how does it work under the hood? This article explains what CSS is with a simple syntax example and covers some key terms about the language. Before using CSS, all styling had to be done in HTML markup. We covered what HTML is and how it is used to markup documents. These documents will be readable in a web browser. Headings will look larger than regular text, paragraphs break onto a new line and have space between them. Links are coloured and underlined to distinguish them from the rest of the text (B., 2023).

1.4 Javascript:

JavaScript is a lightweight programming language that web developers commonly use to create more dynamic interactions when developing web pages, applications, servers, and or even games. Developers generally use JavaScript alongside HTML and CSS. The scripting language works well with CSS in formatting HTML elements. However, JavaScript still maintains user interaction, something that CSS cannot do by itself. JavaScript's implementations within the web, mobile application, and game development make the scripting language worth learning (Jordana, Dec 21, 2022).

1.5 How HTML CSS and Javascript were used in this website?

There is a huge role of the three components (HTML, CSS and Javascript) in developing a website. These three components were used in different places with different roles to make the website look attractive and functional as well. Mainly, HTML was used to develop the skeleton of the page. By using different tags with different roles, the HTML section of the website was completed. For example, there was a huge role of HTML to create the feedback from, table and so on. Likewise, CSS (Cascading Style Sheet) was vastly used to beautify the page. Here, we used three types of CSS, which were internal, inline, and external CSS. The use of CSS was widely in giving the margins, padding, and

giving colors to the fonts and background. We implemented CSS in every page and made it look beautiful. Lastly, we used Javascript in this website to make the website functional because if any activity is done in this website then, javascript would easily implement it. Mainly, the use of javascript in this website was in the fill up form to make it functional. If there is any empty field, then a message would occur and if all the fields are filled correctly, then a message would occur stating that the form is filled correctly. Also, the javascript was used in some buttons and showing the dropdown menu in the navbar.

Finally, after implementing all those components in the website, we found all those components to be useful and it made our website look beautiful and attractive to the user. So, in this way we implemented HTML, CSS and Javascript in our website.

1.6 Verdict:

A website for bonsai plants will either succeed or fail based on a number of criteria, including user satisfaction, capacity to meet goals and objectives, and financial performance. A website dedicated to bonsai plants would be successful if it

1. Attracts and keeps a big number of bonsai enthusiasts.
2. Provides useful and instructive content about maintaining and caring for bonsai plants.
3. Offers an easy-to-use platform for purchasing bonsai plants and related goods.
4. Enhances the sense of fellowship among bonsai fans.
5. Continually becomes better based on user feedback.

A bonsai plant website's success ultimately depends on its ability to satisfy the demands and expectations of its target market.

2 Discussion and Analysis:

2.1 Text editor:

A text editor refers to a computer program that enables user to create, change, edit, open and view text files. Today's, text editors are a core part of a developer's toolbox and are most commonly used to create computer programs create hypertext markup language (HTML) and build web pages (University of York, 2020).

2.2 Features of Text editor:

When it comes to text editors there are common features that they all share. Which makes what text editor a text editor. Features are:

- Easy to use and navigate
- Feature of copy, cut and paste
- Ability to handle UTF-8 encoded text
- Syntax highlighting
- Customizable appearance
- Extensibility (Bradford, 2021)

2.3 Use of Text editor in our coursework:

There are various text editors to choose from to use to develop a website. This was a group coursework therefore we collectively used two text editors:

1. Sublime Text
2. VS code

1) Sublime Text:

Sublime text is versatile, fun, sophisticated and fast text editor used by developers to develop web applications. It is supported on MacOS, Windows and Linux. Its versatility comes from wide range of community developed third party packages

that provide syntax highlighting or other automation provided packaged by Python plugins (Sublime Text Community Documentation, 2022).

Features of Sublime Text:

- i) Auto-completion
- ii) Select Multiple lines of code
- iii) Quickly insert text and code with sublime text snippets
- iv) Jump the cursor to where you want to go

2) VS Code:

Visual Studio Code (famously known as **VS Code**) is a free open-source text editor by Microsoft. VS Code is available for Windows, Linux, and macOS. Although the editor is relatively lightweight, it includes some powerful features that have made VS Code one of the most popular development environment tools in recent times (Mustafeez, 2023).

Features of VS Code:

- i) Git Integration
- ii) Zen Mode
- iii) Easy Debugging
- iv) Default Keyboard shortcuts
- v) Customization

3) Wireframes:

A wireframe is a schematic or blueprint that is useful for helping you, your programmers and designers think and communicate about the structure of the software or website you're building. A wireframe is commonly used to layout content and functionality on a page which takes into account user needs and user journeys. Wireframes are used early in the development process to establish the basic structure of a page before visual design and content is added (Guilizzoni, 2019).

2.4 Use of wireframe in our coursework:

Out of wireframing tools present we used Balsamiq Wireframe to develop wireframe for our course work.

Balsamiq Wireframes is a **user interface design tool** for creating wireframes. You can use it to generate digital sketches of your idea or concept for an application or website, to facilitate discussion and understanding before any code is written. The completed wireframes can be used for user testing, clarifying your vision, getting feedback from stakeholders, or getting approval to start development (Balsamiq, 2019).

Features od Balsamiq:

- i) UI components & icons
- ii) Drag and Drop feature
- iii) Optimized for speed
- iv) Re-useable symbols
- v) Export png & pdf
- vi) Interactive prototypes

2.5 Name of Pages

Home Page:

This is the home page of website. This page basically contains about the contents that is present in different in different major pages of the website. In the page, a concept of card was used in which the description about a particular page was kept. We used six cards in the page to describe about different major pages of this website. Also, there are different components in this page. We have a navbar section, which contains the links to go to all pages of the website. In navbar section we have a dropdown menu in the About Us section. Likewise, we have a footer which contains quick links and contains a form section where you can enter your email and password to join us.

Blog:

This is a blog page of the website. This page contains about how technology has impacted our life nowadays. In this page we start with GIF o top of the page, and text saying technology is best whet it brings people together. This page also contains about recent blog technology and different blog of technologies and how it has impacted our life currently. And we have a navbar section, which contains the links to go to all pages of the website. In navbar section we have a dropdown menu in the About Us section. Likewise, we have a footer which contains quick links and contains a form section where you can enter your email and password to join us.

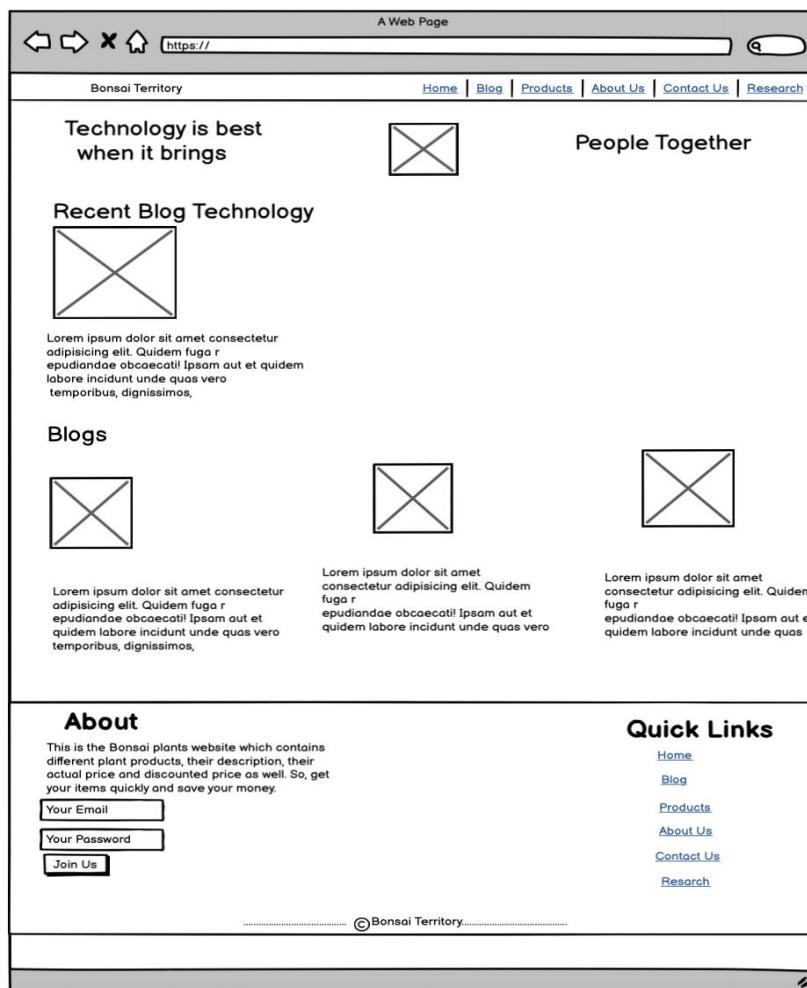

Figure 3: Wireframe of Blog Page

Technology is Best When it Brings

People Together.

Recent Blog Technology

Everything in today's world has revolutionized like the way we live

Blogs

Technology HTML

Technology is a medium to bring things together and to make work easier and convenient. It has become an integral part of human life and it does affects in several ways E-commerce is the best example for this like the website we created is a E-commerce where we can buy the products(bonsai plant) there are some of the impacts of technology in bonsai plants such as payment methods has easy options, it reduces some of the operational cost too.there are some negative impacts too that are concerns of cybersecurity, it kind of increases the pressure for constant adaptation and innovation.

Technology HTML

Writing

Technology plays a vital role in the field of health. It is complex and constantly evolving, also it does have negative impacts too such as hacking and stealing of business data can occur, expensive technology, cheating can be done by the employees through the technology. Maintenance problems and so on.

Technology HTML

Writing Cool

Technology and business are directly proportional to each other because businesses are heavily dependent on technology to grow flourishingly and increase efficiency, it does creates so many opportunities for businesses to reach their customers and also to develop innovative products and services.

Technology has made many tasks more efficient and easier also improved accessibility and communication. it really has a significant impact on business and daily

Customer Review

Aden Gautam

The bonsai plant came in beautiful condition, tall and tiered, healthy, leaves in perfect condition. The delivery service was as easy as can be. This is the third plant I've ordered with Bonsai Territory and they never disappoint! everyone has loved their plants. I highly recommend any plant choice from this store.

Shruti Tuladhar

The team at Bonsai Territory was communicative and proactive. The plant exceeded my expectations which were high to begin with. It is healthy, large, beautiful, feels like I have a piece of the tropics right in my living room.

Qualification	Board	School/college	Pass Year	Division
S.E.E.	N.E.B.	Aishwarya Vidya Niketan	2073	A
+2	N.E.B.	United Academy	2076	A
Bsc.Hons	London Met	Islington College	Running	

Participations

- Leo Orientation training(2022)
- Webinar conducted by STC-NEFTA
- Basic First Aid Course organized by Nepal Mountaineering Association (NMA)
- Volunteered in various event organized by my school and college

Certifications

- Meeting Procedure Training(2020)
- Web development(2022)

Figure 10: Screenshot of About Us Page

Contact Us Page:

This is a contact us page of website. This page contains a feedback form. This form needs to be filled properly which contains first name, last name, age, gender, email, phone number and a feedback message. If any of the field is left empty and submitted then a pop up message is shown saying the form is not filled properly else if it is filled properly then it shows a popup message saying thank you for filling the form and for your feedback. Then we have a navbar section, which contains the links to go to all pages of the website. In navbar section we have a dropdown menu in the About Us section. Likewise, we have a footer which contains quick links and contains a form section where you can enter your email and password to join us.

The wireframe illustrates the layout of the Contact Us page. At the top, there's a header bar with a logo, the site name "Bonsai Territory", and navigation links for Home, Blog, Products, About Us, Contact Us, and Research. Below the header is a title "Feedback Form". The main content area contains fields for First Name, Last Name, Age, Email, Gender (with radio buttons for Male and Female), Phone Number, and a large Message input field. A "Submit" button is located at the bottom of this form. To the right of the main form is a sidebar titled "About" with a descriptive paragraph about the website. Below the "About" section is a "Join Us" form with fields for Your Email, Your Password, and a Join Us button. On the right side of the sidebar is a "Quick Links" section listing Home, Blog, Products, About Us, Research, and Contact Us. At the very bottom, there's a copyright notice "© Bonsai Territory" followed by two small decorative icons.

Figure 12: Screenshot of Contact Us Page

Research Page:

This is research page of website. This page we compare the research we did to improve the quality of websites by taking references and ideas from other websites about how we can carry out the things in the website to make it better. We have carried out various researches to finalize the designs of home page, about us page, description page, product page and more. And we have a navbar section, which contains the links to go to all pages of the website. In navbar section we have a dropdown menu in the About Us section. Likewise, we have a footer which contains quick links and contains a form section where you can enter your email and password to join us.

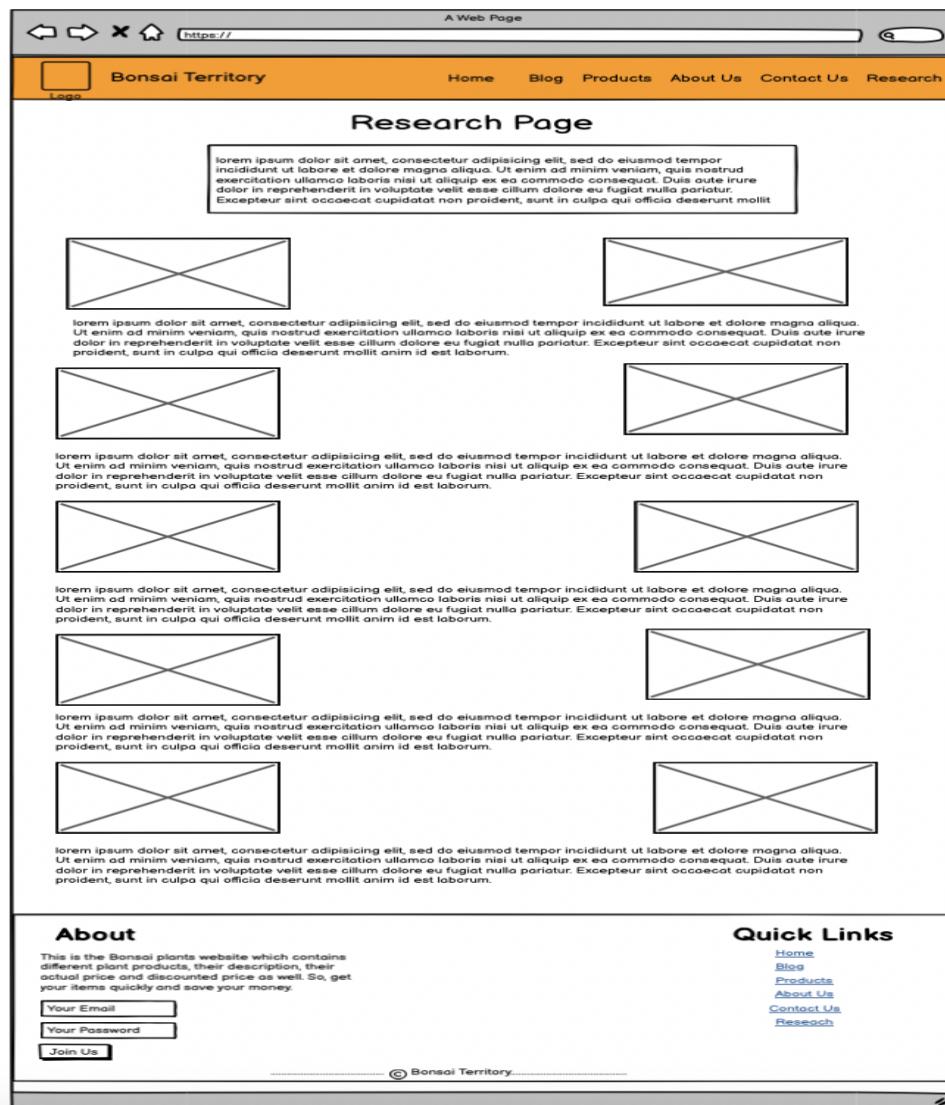

Figure 13: Wireframe of Research Page

Bonsai Territory

Research Page

This is the research page of this website. Here, you may see the different references and different websites that we visited and where we took the reference form. We have presented five different references that we took the idea of by providing you the screenshots of our webpage and that of the webpage that we took the reference from.

Above, you can see two images, one is of our website and the other is that of where we took the reference from. We had to include the description of the bonsai plant which includes different characteristics of it which includes growth rate, growth style, shipping size and short introduction about the plant. The website that we took the reference from is Youngs Garden Shop. You may visit the website and see the description.

Above, you can see two images, one is of our website and the other is that of where we took the reference from. In the home page of our website, we had to include the description about different pages in our website, but we were confused about how to style it. So, we took the reference of CSS. We visited the website called Bonsai Empire. From there, we liked the concept and styling of card. So, we took the reference about card concept and implemented it in on our website.

Above, you can see two images, one is of our website and the other is that of where we took the reference from. In the about us, which is he CV section of our website, we had to include all the details of our team members. The details include short intro, their educational background, participations, certifications, technical skills. But, we were confused how to present their CV. So, we visited a website called

Above, you can see two images, one is of our website and the other is that of where we took the reference from. We had to make a feedback from on our website with functional javascript actions. While making this, we did our research and visited a website called Web Design Dev and found out the concept of table used in that form. So, we used the concept of table which includes table row and table data tags. We implemented it on our website and modified it as well to finally present the feedback form.

3 Testing

3.1 Test 1: Form validation testing of footer

Objective	To validate the form when user enters email and password in it and clicks the Join Us button.
Action	Writing email address and password in their respective section.
Expected Result	We would get an alert message as “Thank you for joining us”.
Actual Result	We got the alert message as “Thank you for joining us”.
Conclusion	The test was successful.

Table 1: Form validation testing of footer

The screenshot shows the Bonsai Territory website. At the top, there is a banner featuring a bonsai tree in a rectangular pot. Below the banner, the main content area has a dark background. On the left, there is an 'About' section with text about the website and a 'Join us' form containing fields for email and password, and a 'Join Us' button. On the right, there is a 'Quick Links' sidebar with links to Home, Blog, Products, Research, About Us, and Contact Us. A copyright notice at the bottom reads '© 2023 Bonsai Territory.....'

Figure 15: Before testing the form validation

The screenshot shows the same Bonsai Territory website as Figure 15, but with a modal dialog box overlaid. The dialog contains the text "This page says Thank you for joining us." and an "OK" button. The rest of the page content is visible below the dialog, including the 'About' section, 'Join us' form, 'Quick Links' sidebar, and copyright notice.

Figure 16: After testing the form validation

3.2 Test 2: Testing for dropdown menu in navigation bar

Objective	To show the dropdown menu when someone clicks on the about us button of navigation bar
Action	Clicking on About-us on navigation bar.
Expected Result	We would see the dropdown menu
Actual Result	We saw the dropdown menu
Conclusion	The test was successful.

Table 2: Dropdown menu testing

Figure 17: Before clicking About Us button

Figure 18: After clicking About Us button

3.3 Test 3: Testing for pop up message in feedback form

Objective	To make the Thank You message appear on the screen when someone correctly submits the feedback from
Action	Filling the feedback form properly entering First name, Last name, age, gender, email, phone number and a feedback message.
Expected Result	A Thank You message would pop up on the screen.
Actual Result	Thank You message was popped up on the screen.
Conclusion	The test was successful.

3.5 Test 5: Testing for internal link in this website

Objective	To visit the Contact Us page in this website when someone clicks on the Contact Us link in the navigation bar
Action	Clicking on Contact us to test internal link.
Expected Result	The Contact Us page would appear on the screen
Actual Result	The Contact Us page appeared on the screen.
Conclusion	The test was successful.

Table 5: Testing for internal link

The screenshot shows the homepage of the Bonsai Territory website. At the top, there is a navigation bar with links for Home, Blog, Products, About Us, Contact Us (which is highlighted in pink), and Research. Below the navigation bar, the main content area features a large green title 'User Friendly E-Commerce Website'. Underneath the title is a black text block stating: 'This is a user friendly E-Commerce website. Here, you may get your items according to your query and can get them in a very discounted price. So, "Get your item, save your money".' To the right of the text is a photograph of a small bonsai tree in a black pot. Below the title, there is a section titled 'Description' with a sub-section showing a photograph of hands holding a small plant.

Figure 23: Before clicking the Contact Us link

The screenshot shows the 'Feedback Form' page of the Bonsai Territory website. The page has a blue header with the title 'Feedback Form'. Below the header is a form with several input fields: 'First Name' (text input), 'Last Name' (text input), 'Age' (text input), 'Gender' (radio buttons for Male and Female), 'Email:' (text input), 'Phone Number:' (text input), and a large 'Message' text area. At the bottom of the form is a 'Submit' button.

Figure 24: After clicking the Contact Us link

3.6 Test 6: Testing for external link in this website

Objective	To visit the facebook profile of the person when someone clicks on the facebook icon
Action	Clicking on facebook logo below contact info in the left side of the page.
Expected Result	The facebook profile would appear on the screen.
Actual Result	The facebook profile appeared on the screen.
Conclusion	The test was successful.

Table 6: Testing for external link

Figure 25: Before clicking the facebook logo

Figure 26: After clicking the facebook logo

4 Conclusion:

Finally, after the completion of this coursework, we came into the conclusion. This was a coursework full of practice of the three basic components of the web development, which are HTML, CSS and Javascript. We had to make an E-commerce website which sells the bonsai plants as the products and also had to give some description about the products. Since, this was a group coursework, we were five members in the team. Every single individual team member played their important role in developing this website as the work was equally divided to all the members.

We basically used the concept of HTML, CSS and Javascript in this website. Every single page in this website needed those components. Firstly, we developed a wireframe for each page of this website and after that we started to develop it. The HTML tags were used to create a basic skeleton to this website. We used different HTML tags like `<div>`, ``, `<table>`, `<form>`, etc and each tag had its individual role. Image tag was used to present the images. This tag had the biggest use in the product page. Likewise, form tag was used to develop a form where the users could enter their details and send us the feedback message. We used the concept of table tag in form validation and in the CV page to present the educational background of our team. After, the completion of HTML, we used CSS to give style to the pages. We have some hover effect, some background colors, box shadow, giving and margins and padding to the components, etc. We used all three internal, external and inline CSS here. Finally, we used the Javascript concept to make the website functional. We used internal and external Javascript in our coursework. We used Javascript in the form validation of footer section to present an alert message. We also used JS concept in feedback form to pop up the message whenever someone fills the form. Likewise in purchase button also, we used JS to alert the user by presenting an alert message. So, this is how we used the concept of HTML, CSS and Javascript in our coursework.

However, this coursework was not an easy task to do. We faced many problems while doing this coursework. So, we did some research and visited some website where we could take the reference from. While developing pages, we visited many sites and took some concept from there and modified it in our coursework. We visited some templates

about a particular section in our website and used the concept of that template by modifying it in our coursework. Not only in the page development part, but we also took some reference in our report part. We search for the proper definition of HTML, CSS, Javascript and text editor from different websites and added that in our citation. So, overall it is very helpful project for the beginners and from this coursework we learned about the basic use of HTML, CSS, and Javascript in a website.

</div>
<div class="desc">
<p>Above, you can see two images, one is of our website
and the other is that of where we took
the reference from. In the home page of our website, we
had to include the description about
different pages in our website, but we were confused
about how to style it. So, we took the
reference of CSS. We visited the website called <a
href="https://www.bonsaiempire.com/">
Bonsai Empire</a>. From
there, we liked the concept and styling of
card. So, we took the reference about card concept and
implemented it in on our wesbite.
</p>
</div>
</div>

<div class="flex1">
<div class="img1">

</div>
<div class="img2" style="margin-top:-20%;">

</div>
<div class="desc">
<p>Above, you can see two images, one is of our website
and the other is that of where we took
the reference from. In the about us, which is he CV
section of pur website, we had to include all
the details of our team members. The details include
short intro, their educational background,
partcipations, certifications, technical skills. But, we
were confused how to present their CV. So,
we visited a website called <a href="https://certy.px-
lab.com/html/demo1/">
```

>Certy Wordpress Resume where we took the reference from. We got the idea of making two div tags, one for showing image and contact details, and the other for showing the CV details. So, we used this concept and implemented on our website.

```

        </p>
    </div>
</div>

<div class="flex1">
    <div class="img1">
        
    </div>
    <div class="img2" style="margin-top:-30%; width:53%; margin-left:48%;">
        
    </div>
    <div class="desc" style="padding-top:1%;>
        <p>Above, you can see two images, one is of our website and the other is that of where we took the reference from. In this webpage, we had to include the product list that we have. But we were confused about styling it. Then we did our research and visited a website called <a href="https://bonsaihaat.in/" style="text-decoration:none;">Bonsai Haat</a>. From there, we used the concept of styling the products. We liked the hover effect on the products, so we decided to add hover effect on our products as well. So, we used the hover efffect concept from this website.
        </p>
    </div>
</div>

<div class="flex1">
    <div class="img1" style="margin-left:2%;>
        
    </div>
    <div class="img2" style="margin-top:-25%; width:35%; margin-left:60%;>

```

```

</div>
<div class="desc">
<p>Above, you can see two images, one is of our website  

and the other is that of where we took  

the reference from. We had to make a feedback form on our  

website with functional javascript  

actions. While making this form, we did our research and  

visited a website called  

<a href="https://colorlib.com/etc/cf/ContactForm_v5/index.html" style="text-decoration: none;">  

Web Design Dev</a> and found out the concept of table used  

in that form. So, we used the concept of  

table which includes table row and table data tags. We  

implemented it on our website and modified it  

as well to finally present the feedback form.  

</p>
</div>
